

Dear 2022 Primary Candidate:

Enclosed is a brief Questionnaire for you to **complete and return by June 3, 2022** for the upcoming August primary election. We plan to inform registered voters in your district of your views on issues related to protecting health choice. This issue is top-of-mind for many voters after the COVID-19 pandemic. Our members, and many Michiganders, believe that **no person should ever be prevented from receiving early, effective treatment for COVID-19 or be forced to be tested and tracked, wear a mask, or take a vaccine to go to school, work, fly or move freely through society.** With financial support and an army of volunteers, we plan to endorse and promote candidates that will fight for health choice.

The COVID-19 pandemic has led to *unprecedented* governmental intrusion into the choices we make for our own health, and that of our children. We believe that Michigan public health officials exceeded their legal powers, with no legislative or judicial oversight, and instituted ineffective, unproven and unwanted mandates for masking, testing and contact tracing that negatively impacted many Michiganders, including our children.

Many employers and colleges instituted sweeping mandates in addition to mandating the COVID-19 vaccine. These experimental vaccines have no long-term safety data, use an entirely new mRNA platform and skipped standard regulatory requirements by conducting preclinical, Phase 1, 2 and 3 testing in just a matter of months – a critical process of testing that takes many years to decades to ensure safety.

To date, the CDC/FDA Vaccine Adverse Events Reporting System (VAERS) has received **1,261,147** adverse event reports after COVID-19 vaccination, including **27,968** deaths, **51,996** permanent disabilities, **155,633** hospitalizations, and **40,328** cases of myocarditis. There are more adverse events reported for the experimental COVID-19 vaccine, than **all other vaccines combined for the past 30 years.** Even more frightening is the fact that VAERS is a passive reporting system, the FDA estimates only 1-10% of all adverse events are even reported meaning **the harm caused by these vaccines is exponentially higher than what is reported.**

Many Michiganders have been coerced and pressured to take an unwanted experimental therapy or lose their job or right to attend the college of their choice. We also got a taste of a '**checkpoint society**' by implementation of '**vaccine passports**' that served to make one's ability to move freely through society dependent on taking an experimental vaccine.

Importantly, it has also become clear that governmental and public health authorities, in partnership with big-Tech and big-Pharma, have suppressed the off-label use of early, effective COVID-19 treatments using FDA-approved drugs with **proven safety records.** It is estimated by medical experts that **hundreds of thousands of COVID-19 deaths could have been averted if citizens had access to early treatment.**

Millions of Michiganders say, NEVER AGAIN. Thank you for taking a few minutes to fill out and return our Questionnaire. This year, the endorsement of the Michigan Health Choice Alliance PAC will be an important factor for many registered voters. Please email [advocacy@mihealthchoice.org](mailto:advocacy@mihealthchoice.org) with any questions you may have. Thanks for participating.

Suzanne Waltman - Treasurer

## 2022 MICHIGAN FEDERAL & STATE CANDIDATE QUESTIONNAIRE

Please circle the answer which best indicates your position for each question.  
Your answers are reported to constituents in your district. Thank you for your participation.

1. I support the rights of individuals and parents, in consultation with their medical providers, to make health decisions that are appropriate for themselves, and their children, such as mask wearing, testing for COVID-19 or taking a vaccination.  
Agree Disagree Undecided                      Would sponsor/cosponsor legislation:    Yes    No
2. I support legislative approval before any unelected bureaucrat imposes health mandates on the public, including our public schools, such as mask wearing, testing for COVID-19 or receipt of any vaccination.  
Agree Disagree Undecided                      Would sponsor/cosponsor legislation:    Yes    No
3. Statute 333.9215 allows parents to exempt their children from any vaccination mandate for medical, religious, or other reason. I support legislation that extends this into adulthood.  
Agree Disagree Undecided                      Would sponsor/cosponsor legislation:    Yes    No
4. I support the rights of employees, in consultation with their medical providers, to make health decisions that are appropriate for themselves such as taking a vaccination.  
Agree Disagree Undecided                      Would sponsor/cosponsor legislation:    Yes    No
5. I support legislation that would withhold tax-payer funding for any organization or entity that implements vaccine mandates without making vaccine exemptions easily accessible for medical, religious, or other reason.  
Agree Disagree Undecided                      Would sponsor/cosponsor legislation:    Yes    No
6. I support access to early, effective, off-label treatments for COVID-19 with FDA-approved drugs with a proven track record of safety.  
Agree Disagree Undecided                      Would sponsor/cosponsor legislation:    Yes    No
7. I support legislation that would make ivermectin, and other FDA-approved therapies with proven safety records, available over the counter for COVID-19 as in many other countries and states (Tennessee).  
Agree Disagree Undecided                      Would sponsor/cosponsor legislation:    Yes    No
